Aspiring DevOps & Python Engineer

Professional Summary

Detail-oriented Computer Science Engineering student with a strong technical foundation in **Python development, Linux administration, and DevOps automation**. Experienced in building scalable CI/CD pipelines and utilizing data science libraries for predictive modeling. Committed to leveraging automation to improve software reliability and deployment efficiency.

Education

Sri Venkateswara College of Engineering and Technology 2022 – 2026
Bachelor of Engineering – Computer Science and Engineering **CGPA: 8.4**

- Recognized as **Class Topper** for outstanding academic performance across all semesters.
- Focused on Core CS: Data Structures, Operating Systems, and Cloud Computing.

Sri Chaitanya Junior College 2020 – 2022
Higher Secondary Certificate (HSC) **Score: 92.2%**

Sri Chaitanya Techno School 2020
Secondary School Leaving Certificate (SSLC) **94.5%**

Technical Skills

- Programming:** Python (Pandas, NumPy, Matplotlib, Seaborn), C, SQL, HTML/CSS
- DevOps & Tools:** Jenkins, Docker, Kubernetes, Git/GitHub, Maven, Ansible (Basics)
- Infrastructure:** AWS (EC2, S3), Linux Administration (Ubuntu/CentOS), Apache Tomcat
- Soft Skills:** Critical Thinking, Agile Collaboration, Problem Solving, Communication

Projects

Automated CI/CD Pipeline Implementation *Jenkins, Docker, Maven, Linux*

- Designed and deployed a robust CI/CD pipeline to automate software testing and delivery workflows.
- Utilized **Jenkins** for continuous integration, reducing manual build intervention by 80%.
- Implemented **Docker** containerization to ensure environment parity across development and production.
- Managed artifact builds with **Maven** and deployed production-ready code to **Apache Tomcat** servers.
- Optimized system uptime by implementing automated deployment scripts on Linux environments.

Water Quality Monitoring & Risk Prediction *Python, Machine Learning, Scikit-Learn*

- Engineered a data analysis tool to evaluate water safety metrics across various Indian states.
- Conducted extensive data preprocessing and feature scaling on pH, turbidity, and chemical levels.
- Applied classification algorithms to predict water potability, achieving high accuracy for risk assessment.
- Generated heatmaps and trend graphs to visualize regional contamination patterns for better decision-making.

IMDB Movie Dataset Analysis *Python, Matplotlib, Exploratory Data Analysis*

- Processed a dataset of 1,000+ movies to identify key factors contributing to commercial and critical success.
- Visualized genre-specific trends and revenue correlations using **Matplotlib** and **Seaborn**.

Certifications & Achievements

- Artificial Intelligence** – NPTEL / IIT Kharagpur (Certified Excellence)
- DevOps Masterclass** – Elevate Labs (Hands-on training in CI/CD and Containerization)
- Python for Data Science** – Intern Certify
- Academic Achievement:** Secured 1st Rank in the Department of Computer Science and Engineering.

Relevant Coursework

Foundations: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks.

Specialized: Cloud Infrastructure, Software Engineering, Object-Oriented Programming (OOPs).
